Title	<i>Project Update</i>
Purpose of the report	To note
Report Author	<i>Daniel Dredge Sandy Muirhead</i>
Ward(s) Affected	All Wards
Exempt	No
Exemption Reason	<i>n/a</i>
Corporate Priority	Community Affordable housing Recovery Environment Service delivery
Recommendations	For noting the improvements to project management and ongoing development of the project management site
Reason for Recommendation	<i>Not applicable</i>

1. Summary of the report

1.1 This report provides an update on the active projects across Spelthorne. The report covers a wide range of projects, including technical infrastructure development, community programmes, and environmental initiatives. The report details the progress made on each project, the resources allocated, and the expected completion dates.

The report highlights the successful completion of several projects, including the introduction of cashless parking, WIFI installation at Harper House, and an initiative to tackle the abuse of psychoactive substances by way of a PSPO. We're demonstrating value for money for residents by ensuring that resources are being used effectively and efficiently to deliver high-quality projects.

The report also discusses the challenges encountered in some of the ongoing projects, including 3rd Party delays and difficulties in securing funding.

1.2 Any further information on the projects listed should be requested directly from the project manager or sponsor.

1.3 The dashboard is intended to provide a comprehensive overview of Spelthorne's project portfolio, demonstrating the organisation's commitment to enhancing the well-

being of the community and the environment while ensuring that taxpayer money is being used responsibly.

2. Key issues

- 2.1 The dashboard indicates there are currently 25 active projects in progress. Not including Asset projects or transformation activities the team are undertaking to improve process efficiency.
- 2.2 Since the last update, 13 projects have been completed, demonstrating that continuous progress is being made.
- 2.3 The majority of projects were initiated by the projects team, as a result of the Continuous Service Improvement (CSI) work carried out across all services. This suggests that the team is proactively identifying areas where improvements or new initiatives are needed.
- 2.4 The second highest number of projects falls under the category of Economic Development, which is being driven by the Joint Prosperity Funds grant from DLHUC. Investing in economic development projects has the potential to benefit the local community.
- 2.5 Of the active projects, 56% are proceeding with a Green RAG indicator, representing that they are progressing as planned and are on track to meet their objectives.
- 2.6 20% of projects are proceeding with amber warnings, largely due to delays in 3rd party SLAs. This indicates that they are largely being impacted by external factors beyond the council's control.
- 2.7 Of the 24% of projects flagged as Red, 67% are due to the wait for DLHUC grant funding allocation and this will be resolved within a short timeframe, potentially before this report is circulated.
- 2.8 Two members of the project team have received PRINCE2 project management accreditations since the last update. This is a positive development, as having accredited project managers on the team will help ensure that projects are managed effectively and efficiently.

The Project manager accreditations were earned through a certification programme which provided training and testing on project management skills and knowledge. The individuals who successfully completed the program are now recognised as certified project practitioners.

Having certified project managers on the team will help to improve our project management processes, increase the chances of successful project outcomes, and reduce risks associated with project failure. We are building a level of expertise and experience within the team that will help identify potential issues and risks early on in projects and develop strategies to mitigate them. They can also help to ensure that the project is delivered on time, within budget, and to the expected quality standards.

Overall, this is a positive development for the council's project management capabilities and may lead to better outcomes for the projects being managed.
- 2.9 Members are invited to scrutinise projects at their convenience through access to the Project Dashboard, which is accessible to anyone with a '@spelthorne.gov.uk' email address, through this link: [Project Dashboard](#) or by scanning this code on a Spelthorne issued phone or tablet.

- 2.10 Many projects require the procurement of goods and services, but this is not always the case. The project team is currently engaged in 55 projects across the entire Council, many with a unique focus on process improvement, innovation and optimization, rather than procurement. These projects are designed to find new and better ways of doing things, streamline workflows, process map, and undertake other activities aimed at supporting CSI.

By implementing these projects, the team has successfully saved a total of £283,000 since 2020, in terms of time saved. This extra time has been utilised for value-added tasks, such as undertaking more productive activities, delivering better services to residents, or allocating resources towards other high-impact projects. The project team's efforts towards improving processes have led to significant benefits, both in terms of cost savings and enhanced productivity.

- 2.11 Asset projects are currently reported through the 'Development and Investment Group' (DIG) and the Corporate Policy and Resources Committee. The Council has strengthened its governance arrangements to ensure that acquisitions are scrutinized, and development projects are monitored effectively.

3. Options analysis and proposal

- 3.1 **Option 1** That Services are compelled to engage with the Project Team early in the project initiation stage as our methodologies for project management include a range of processes, procedures, and best practices designed to help ensure successful project delivery. By following these methodologies, the project team can increase the likelihood of meeting project goals, staying on schedule, and within budget, while also ensuring transparency and accountability in project decision-making. This would take the form of blocking any projects which are running outside of this process.

- 3.2 **Option 2** not following the methodologies in place can result in project failure, a lack of governance, and negative consequences for the Council and its stakeholders.

4. Financial implications

- 4.1 Projects should not be initiated unless there is a clear business case and funding stream in place. These should be indicated at the project planning stage.

- 4.2 Project business cases include the procurement business case document as appropriate.

5. Risk considerations

- 5.1 Managing projects without guidance from the project team will greatly increase the risk of:

- Project failure: Without a proper methodology, there is a higher risk of project failure, which can result in wasted resources, financial losses, and reputational damage.
- Budget overruns: Ineffective project management can lead to cost overruns, which can have a negative impact on the councils' finances.
- Delays: Poor project management can cause delays, which can have a cascading effect on other projects and initiatives.
- Lack of governance: Not following project methodology can result in a lack of governance, which can lead to decision-making that is not aligned with the Authorities goals or stakeholder expectations.
- Inadequate communication: Poor project management can lead to inadequate communication and collaboration between team members, stakeholders, and Services.

6. Procurement considerations

- 6.1 Consultations with the Procurement team (procurement@spelthorne.gov.uk) occur regularly and any procurement considerations in projects are fully considered where appropriate.

7. Legal considerations

- 7.1 Many projects have some legal element especially if SLAs or contracts are required so consultation is required with the Legal team.

8. Other considerations

- 8.1 In order to ensure successful delivery of projects, it is imperative to allocate resources with the same level of attention as financial needs. This involves carefully considering relevant departments and services and making sure that the necessary skills are available to meet delivery deadlines.
- 8.2 Effective prioritisation of workloads is essential to engage key members of the delivery team and ensure deadlines are met within the current structure and working practices of the Council.
- 8.3 If resource availability poses a risk and threatens to impede the agreed delivery date, it is vital to escalate the issue and produce a revised implementation timetable to mitigate the potential impact.
- 8.4 Therefore, a Project/Programme Board will be re-established to oversee this role.

9. Equality and Diversity

- 9.1 Our project workflow is designed to reduce negative impacts on equality and diversity in several ways:
- Clear project goals and objectives: By having clear project goals and objectives that are aligned with the Council's commitment to diversity and inclusion, we will ensure that Spelthorne is working towards creating positive impacts for all stakeholders, including those from diverse backgrounds.
 - Inclusive project planning: Inclusive project planning can help to identify potential impacts on different groups of stakeholders, including those from diverse backgrounds. This will help us to anticipate and mitigate any negative impacts on equality and diversity.

- Effective stakeholder engagement: Engaging with stakeholders from diverse backgrounds helps identify potential issues and concerns related to equality and diversity, and we will work collaboratively to address them.
 - Regular monitoring and reporting: Regular monitoring and reporting on project progress helps the project team to identify any issues related to equality and diversity and take corrective action where necessary.
- 9.2 By taking these steps, we aim to ensure that projects have a positive impact on equality and diversity and avoid any negative impacts that may arise from not considering these important issues.

10. Sustainability/Climate Change Implications

- 10.1 Robust Project processes play a crucial role in supporting sustainability and mitigating the impacts of climate change. Here are some ways the project team aims to contribute to these efforts:
- Incorporating sustainability goals: Projects integrate sustainability goals as part of their objectives where possible and ensure that their processes and outcomes align with sustainability principles. This typically involves setting targets for reducing energy consumption or greenhouse gas emissions, using sustainable materials, or ensuring responsible waste management practices.
 - Conducting environmental impact assessments: Before starting a project, an environmental impact assessment is conducted (if applicable) to identify the potential environmental impacts of the project and develop strategies to mitigate or avoid these impacts. This can help to reduce the project's overall environmental footprint.
 - Collaboration with stakeholders: Projects often engage with a range of stakeholders, including communities, NGOs, and government agencies, to identify and address potential environmental impacts, and involve them in developing sustainable solutions. This will lead to greater accountability and transparency and can result in better outcomes for both the project and the environment.
 - Sustainable procurement: We aim to incorporate sustainable procurement practices, such as purchasing materials and services from suppliers who have a strong environmental record, use sustainable materials, or have a commitment to reducing their environmental impact.
 - Monitoring and reporting: This can help to identify areas for improvement and ensure that the project remains on track to achieve its sustainability objectives.

Overall, our project processes have a significant impact on sustainability and climate change and by integrating sustainable practices into these processes we will help to create positive environmental outcomes.

- 10.2 Since the last update, the projects team have been certified as carbon literate.

Members Briefing Pack

Neighbourhood Services and Enforcement Committee

18 April 2023

Title	<i>Road channel sweeping</i>
Purpose of the report	To note
Report Author	<i>Jackie Taylor Group Head Neighbourhood Services Darren White Operations Manager Neighbourhood Services</i>
Ward(s) Affected	All Wards
Exempt	No
Exemption Reason	<i>Not applicable</i>
Corporate Priority	Environment
Recommendations	Committee is asked to: Note the report
Reason for Recommendation	<i>This report has been requested by the Neighbourhood Services and Enforcement (NS&E) committee</i>

1. Summary of the report

1.1 A member of the NS&E committee has requested this report based on street sweeping and parking be available for open discussion at a future meeting. The terms of the report were agreed at the committee in January, and it was agreed by members that the report should focus on identification of roads with high levels of parking. The report will also include the leafing schedule and any additional costs associated with potentially increasing road street sweeping over and above the schedules already conducted by Neighbourhood Services.

2. Key issues

2.1 Keeping our streets clean is a key concern for Spelthorne residents and for many of them it is the one Council service that affects their quality of life daily. The Council has recognised this and makes cleanliness one of its key priorities for the borough.

2.2 Streets including roads in the charge of the local authority, are a public right of way. Residents do not have any priority right to the stretch of road (which includes the footpath/grass verge and carriageway) in front of their property. The property effectively in the resident's possession and control extends to its boundary with the public path or road. This boundary runs along the edge of

the footpath that joins the outer face of the residents front wall/fence and continues along the end of their driveway. If car parking is permitted on the road, all motorists, including visitors, have the right to park outside the resident's property provided their car is not causing an obstruction.

- 2.3 All residential streets in the borough should enjoy high standards of cleanliness irrespective of where they are located. To achieve this requires a flexible approach to street cleaning, which can respond better to the varying demands of various locations.
- 2.4 Street character types set out not only the basic parameters of streets, such as carriageway and footway widths, but also the street's relationship to buildings and the private realm, and other key details, such as parking arrangements, street trees, planting, and lighting.
- 2.5 Whilst some streets are more important than others in terms of traffic flow, some are also more important than others in terms of their place function and deserve to be treated differently. The varying schedules of sweeping which are explained within this report allow the Council to treat its different roads within the borough in this way and be more flexible and efficient.
- 2.6 It should also be noted that cluttering tends to take place over time by the incremental addition of signs to serve a particular purpose without regard having been given to the overall appearance of the street and subsequently the ability to be able to conduct an effective mechanical cleansing service.
- 2.7 All adopted highway roads are swept regularly on a schedule. Busy high streets are swept more regularly than residential roads.
- 2.8 The street cleansing team consists of seventeen operational employees who conduct the following tasks: -

Litter bin clearance	3 employees & 2 vehicles (small RCV)
On foot Beat sweepers	8 employees,
Mobile beat sweepers	1 employee & 1 vehicle (small van)
Mechanical sweepers	5 employees & 5 vehicles (1 large sweeper, 2 channel sweepers, 2 footway sweepers)
- 2.9 Street trees are a feature in most roads in the borough, however some roads have a much greater quantity of street trees than most. This creates increased leaf fall on the footway and the road channels, to tackle the issue of fallen leaves in the streets with a higher number of street trees we conduct an annual leaf clearance programme which can be found on the Council web site.
- 2.10 The annual programme is conducted during the autumn but with changing seasons the date is not set as we rely on the weather pattern and the first hard frosts which is when leaves start to fall.
- 2.11 To manage this annual leafing programme all mechanical sweeping operatives are diverted away from their scheduled programmes and redirected as a group to manage this programme of work. Where staffing allows, we would supplement this with additional staff on foot.

- 2.12 One cycle of the leafing programme takes approx. 2 weeks to complete and depending on weather we may have to complete the whole cycle 2 or 3 times during the autumn.
- 2.13 At all other times of the year road channels are swept mechanically by the channel sweepers on varying schedules which can range from daily to weekly or on a 20-day schedule. Most residential streets are swept on a 20-day schedule whereas high streets, shopping centres & car parks are swept daily or more frequently depending on the location.
- 2.14 Access to channels due to parked cars (resident and commuter parking) create large pockets of the borough where sweeping cannot be conducted successfully. Sweeping schedules have built into them periods of spare days where drivers can use their own initiative and experience to go back on roads where sweeping has not been effective due to parked cars.
- 2.15 There are rare occasions where roads such as Guildford Street in Staines are swept within a parking suspension organised and enforced by our parking team. This involves parking officers placing signage on lamp columns within a specific road advising that parking is not permitted on a specific day and on a specific time. Parking officers are then tasked with patrolling during the parking suspension period and will issue Penalty Charge Notices (PCNs) to any cars who have ignored the suspension.
- 2.16 This is a time-consuming process for parking officers and is not always successful. Our ability to create these parking suspensions will cease at the end of March as Surrey County Council (SCC) have ended the agency agreement and will take back on street parking enforcement. Enquiries have been made to SCC in relation to potential costs for creating and managing a street parking suspension, post March 23, to date we are still awaiting a response which is due to management and implementation of the new on street parking contract.
- 2.17 The large sweeper sweeps on varying schedules and most of the work conducted by this machine is on the main and high-speed roads across the whole borough. A lot of this work is on a 20-day schedule but there are more frequent schedules for main shopping areas which vary from daily to weekly.
- 2.18 The footway sweepers also work to schedules but they are more flexible as they are also required to be very reactive in dealing with issues such as spills, litter issues, dog fouling etc. They also sweep the pedestrian areas of large and small shopping areas. These sweepers provide a service that is based on need.
- 2.19 Neighbourhood Services do not carry a surplus of street cleaning staff who are able to step in to cover any absences of the drivers. Due to the extremely prohibitive cost of leasing/owning/maintenance of sweeping vehicles we do not carry spare vehicles to cover breakdowns or general maintenance.
- 2.20 All street cleansing and sweeping is subject to operatives and machinery being available on the day. If we have an urgent reactive issue to deal with that cannot wait, we will redirect other staff from their duties to manage the issue.
- 2.21 To assist members to understand the frequencies of channel sweeping and leafing conducted by the Street Cleansing team a spreadsheet is attached at **Appendix 1.**

2.22 **Appendix 1** shows that we have 845 roads in the borough and of that 845, 229 of those roads are heavily parked during the day. This is broken down as follows: -

	20% PARKED	50% PARKED	80% PARKED	100% PARKED	Total
Ashford	27	43	69	75	214
Staines	29	38	43	33	143
Shepperton	50	34	41	28	153
Sunbury	18	61	50	45	174
Laleham	10	3	17	10	40
Stanwell	15	21	46	39	121
Total	149	200	267	229	845

2.23 To mitigate the issues related to these heavily parked roads we have built spare capacity within the 20-day schedules for the drivers to return to areas where accessing the channels to sweep has been difficult.

3. Financial implications

3.1 Members of the Neighbourhood Services & Enforcement committee requested that as part of this report we provide an idea of potential increased costs should members decide that they would like to make recommendation from this report to increase both its fleet of sweeping vehicles and its number of operatives. The cost per year to have one extra sweeping vehicle and two vehicle drivers are anticipated to be as below: -

Driver (including oncosts) x 2 £65,000 (working on a shift pattern over 7 days but does not allow for driver absence)

Sweeper(diesel) x 1 £45,000 (sweeper vehicles are priced on driver hours)

Maintenance £5000

Running costs £5000

Total approx. £120,000 per year

3.2 When leasing sweeping vehicles, the minimum cost-efficient term of a lease would be four years.

3.3 **Appendix 1** identifies a very high level of roads that are either 80% (267) or 100%(229) parked for most of the time.

3.4 One consideration to address this subject of parked cars, as requested by a member of the NS&E committee is given in **3.1** above. Another alternative consideration which would incur additional costs (over and above 3.1) would be to create a parking suspension every working day of the year for 100% parked roads, or once every two years if including the 80% parked roads.

- 3.5 This would have additional financial & staffing implications over and above that detailed in 3.1, related to engaging with Surrey County Councils new parking contractor to create and enforce daily suspensions in 229 roads.
- 3.6 Spelthorne has significant budget gaps in future years and any proposed additional spend would need to be offset against savings within the relevant service. The committee would need to identify where these savings could be achieved from to progress and fund this potential increased level of service.

4. Risk considerations

- 4.1 This is a to note report only and at this stage the only risks associated with increased street maintenance are the financial risks related to potentially increasing the Councils budgets when it is already facing a particularly challenging financial future.
- 4.2 There is also the risk that sending sweepers out during the early mornings at weekends could result in an increased level of customer complaints due to noise.

5. Procurement considerations

- 5.1 The Council has recently carried out a procurement exercise to replace its existing fleet of waste and cleansing vehicles and if the Council decides it chooses to include this additional sum of money to its future budgets we could approach our suppliers to seek costs to add an extra sweeping vehicle on to the new contract which is effective from June 2023.

6. Legal considerations

- 6.1 At this stage there are no legal considerations to consider. The NS&E committee are not able to spend money not already budgeted for and if they wished to make a recommendation to take this forward it would follow the rules of the committee process.

7. Other considerations

- 7.1 The current sweeping and leafing schedules have been carried out very successfully this way over several years with changes made to adapt to changing circumstances without incurring additional service costs. This subject of street parking is one that is recognised across all authorities. Where cars are parked, it is not always possible to sweep or cleanse around them, where there is a risk of damage to the parked car.

8. Equality and Diversity

- 8.1 This information is to note and will not have any direct equality and diversity impacts. However, it could be said that any increased level of service especially when considering street services will provide an improvement for those who are elderly or have a mobility disability.
- 8.2 This is mitigated within the current service level by providing both an initiative-taking and reactive service within the current structure to deal with relevant issues if they arise.
- 8.3 It should also be noted that extra cleansing services could have a negative impact on some residents if Council resources create a schedule where specific streets have additional resources over and above the current schedules.

8.4 The rationale behind our current cleansing programmes is that it provides a consistent approach, with the same service being provided for all wards and streets. Some wards will inevitably be cleaner than others and remain clean for longer.

9. Sustainability/Climate Change Implications

9.1 Adding additional diesel vehicles to our streets has a negative impact on climate change. Most street litter is collected by mobile street cleansing operatives and is disposed of appropriately.
