I noticed a male - I was unable to determine his age - walking off the path towards the trees, which I thought unusual as there are two paths at that point in the park. I slowed to watch him as he appeared to have a tube, or similar, about 30 cm long. As I walked away from him along the path, still watching, I saw him lift it and saw it was a catapult. He aimed the catapult high into the tree and fired it, causing 2 wood pigeons to fly out.
