

Planning Committee

23 July 2025

Application No.	25/00291/FUL		
Site Address	Terminal House, Station Approach, Shepperton, TW17 8AS (Building B to the north west of the railway line)		
Applicant	Mr Lipa Fried		
Proposal	Two-storey side extension to the commercial building		
Case Officer	Matthew Clapham		
Ward	Shepperton Town		
Called-in	This application has been called in by Councillor Boughtflower on the basis that the development, by virtue of its size, bulk and massing will have a detrimental effect on the street scene.		
Application Dates	Valid: 24.03.2025	Expiry: 19.05.2025	Target: Extension of Time agreed to 25.07.2025.
Executive Summary	This planning application involves the erection of a two storey extension to the existing office building – identified as ‘Building B’ in the application on the north western side of the railway line (as opposed to ‘Building A’ on the south eastern side of the railway line and subject to a separate application (25/00293/FUL) which is also to be presented to the Committee this evening). The site is located within a designated Employment Area, and the principle of extending the office building for commercial purposes is considered acceptable. The proposed extension matches the design and style of the existing building, and provides increased floorspace within an existing Employment Area. The proposed development is not considered to be detrimental to the amenity of nearby dwellings and other properties. The County Highway Authority has made no objection to the proposal on highway safety grounds. The level of car parking is considered acceptable. There would be no harmful impact on any adjoining trees. There are no flooding concerns. The proposal would support the existing employment use of the site. Accordingly, the scheme complies with Policies EN1, EN7, CC3 and EM1 of the Core Strategy and Policies DPD 2009 and the proposal is therefore considered to be acceptable.		

Recommended Decision	Approve the application subject to conditions as set out in the Recommendation section (paragraphs 8.1, 8.2 and 8.3).
-----------------------------	--

MAIN REPORT

1. Development Plan

- 1.1 The following policies in the Council's Core Strategy and Policies DPD 2009 are considered relevant to this proposal:
- EN1: Design of New Development
 - EN7: Tree Protection
 - CC3: Parking Provision
 - LO1: Flooding
 - EM1: Employment Development
- 1.2 The National Planning Policy Framework (NPPF) December 2024 is also relevant.
- 1.3 On 19 May 2022, the Council agreed that the draft Spelthorne Local Plan 2022 – 2037 be published for public consultation under Regulation 19 of the Town and Country Planning (Local Planning) (England) Regulations 2012 (as amended). The public consultation for the Pre-Submission Publication version of the Local Plan ended on 21st September 2022 and the local plan was submitted to the Planning Inspectorate on 25th November 2022.
- 1.4 An Examination into the emerging Local Plan commenced on 23 May 2023. However, it was paused to allow time for the new council to understand and review the policies and implications of the emerging Local Plan and to address the issues that were identified in the first week of the Examination, in particular flood risk and its potential implications in relation to the site allocation and delivery strategy of the plan.
- 1.5 On 12 December 2024, the Planning Inspectorate confirmed that the Local Plan examination would resume on the 27 January 2025. This has now taken place and the Examination closed on 18 February 2025. Adoption of the Local Plan by Council could be by September 2025 subject to the plan being found sound by the Inspector and public consultation undertaken on the Main Modifications <https://spelthornelocalplan.info/evidence-base/>
- 1.6 The following policies of the Pre-Submission Spelthorne Local Plan 2022 – 2037 are of relevance:
- PS2: Designing Places and Spaces
 - PS3: Landscape
 - SP2: Ashford, Shepperton and Sunbury Cross
 - E3: Managing Flood Risk
 - ID2: Sustainable Transport for New Developments
- 1.7 The [National Planning Policy Framework](#) (NPPF) states at para 49 that:

Local planning authorities may give weight to relevant policies in emerging plans according to:

- a) the stage of preparation of the emerging plan (the more advanced its preparation, the greater the weight that may be given);
- b) the extent to which there are unresolved objections to relevant policies (the less significant the unresolved objections, the greater the weight that may be given); and
- c) the degree of consistency of the relevant policies in the emerging plan to this Framework (the closer the policies in the emerging plan to the policies in the Framework, the greater the weight that may be given).

1.8 Section 38(6) the Planning and Compulsory Purchase Act 2004 (https://www.legislation.gov.uk/ukpga/2004/5/pdfs/ukpga_20040005_en.pdf) requires applications to be determined in accordance with the development plan (unless material considerations indicate otherwise) and not in accordance with an emerging plan, although emerging policies may be a material consideration.

1.9 At this stage, the policies in the Pre-Submission Spelthorne Local Plan carry limited weight in the decision-making process. The adopted policies in the 2009 Core Strategy and Policies DPD carry substantial weight in the determination of this planning application.

2. Relevant Planning History

Ref. No.	Proposal	Decision and Date
25/00293/FUL	Two-storey side extension to the commercial building (Building A)	Pending Consideration
25/00436/PAP	The change of use from commercial space (Class E) to residential 21 studio flats (Class C3)	Granted 23.05.2025
25/00437/PAP	The change of use from commercial space (Class E) to residential 17 studio flats (Class C3)	Granted 23.05.2025
25/00792/FUL	The addition of a new floor to the existing office building (Building A)	Pending Consideration
25/00793/FUL	The addition of a new floor to the existing office building (Building B)	Pending Consideration

3. Description of Current Proposal

The application site and surrounding area

- 3.1 The application relates to Terminal House and specifically 'Building B' located on the north western side of the railway line at Shepperton Station. Terminal House comprises two separate office buildings, the other being on the south eastern side of the railway line, (known as 'Building A') with both buildings being linked by an elevated walkway across the railway line.
- 3.2 With regard to planning application 25/00293/FUL, also for a two-storey side extension to the commercial building (Building A), this is also being presented to the Planning Committee today for determination.
- 3.3 The existing building is a two-storey office block with a low profile pitched roof and backs directly onto the railway line with a frontage to Station Road. There is car parking to the front of the building and to the side. The site is located within the urban area and within the designated Shepperton Employment Area. The site is located within the Flood Zone 2 (between 1 in 100 and 1 in 1000 year event). To the north east of the application site is an area of land subject to a Tree Preservation Order. The area is mixed in character with predominantly residential properties on this side of the railway, with the exception of the application site.

Proposal

- 3.4 The proposal involves the erection of a two storey side extension to the existing office building. The proposed extension will measure 15.517m in length, has a depth of 6.946m, and 6.582m in height. The extension has been amended from the first submission to be set in from the side boundary to provide a buffer space between the proposed extension and the trees subject to a Tree Preservation Order. It will match the low profile pitched roof in appearance and is of a design and use of materials that matches the existing office building. The application form stated that there will be no loss of parking spaces with the existing 26 being retained. However, following the submission of amended plans, a total of 22 parking spaces will be provided, a reduction of 4 spaces from the existing situation. The additional commercial floorspace will be Use Class E (Commercial, Business and Service). It will have a total additional floorspace of 187 sq. m.
- 3.5 The full set of proposed plans are provided as an Appendix.

4. Consultations

The following table shows those bodies consulted and their response.

Statutory Consultees

Consultee	Comment
County Highway Authority	No objections.

Non-Statutory Consultees

Consultee	Comment
Network Rail	Objection.
Tree Officer	No objections subject to an Arboricultural Method Statement being submitted.
Environmental Health (Contamination)	Requested Informative as property is located on former railway land.

5. Public Consultation

- 5.1 A total of 11 properties were notified of the application.
- 5.2 The Council has received 11 letters of objection to the application.
- 5.3 Reasons for objecting include:
- Inadequate Parking Provision
 - Material Inaccuracies in planning submission
 - Loss of privacy
 - Loss of outlook, visual amenity
 - Electricity substation located within the building

6. Planning Issues

- Principle
- Impacts upon the Character and Appearance of the Area.
- Residential Amenity.
- Parking and Highway Safety.
- Flooding.
- Trees

7. Planning Considerations

Background

- 7.1 The application does not relate to any change of use to residential and the extension in question is not part of the proposal for the conversion of the existing building from an office to 17 residential studio flats (25/00437/PAP). The conversion to residential was approved under Schedule 2, Part 3, Class MA of the Town and Country Planning (General Permitted Development) Order 2015 (as amended). A requirement of Class MA is that the use of a building subject to a prior approval application has to have been within Use Class E for a continuous period of at least 2 years prior to the date of the application for prior approval. The extension would have to be erected and used within Class E for a minimum of two years before it could be subject to an application to convert to residential.

Principle of Development

- 7.2 The site is located within the urban area and is also located within a designated Employment Area. Policy EM1 (Employment Development) of the

Core Strategy and Policies Development Plan Document 2009 (CS & P DPD) states that within the defined Employment Areas, the Council will support in principle proposals for employment development and encourage proposals for extensions that enable business needs to be met and make the most effective use of available employment land.

- 7.3 Notwithstanding the Prior Approval that has been granted for the conversion of the existing building into residential flats, this application is for an extension to an existing commercial property in the same Use Class E commercial use as existing. Any potential future uses for the site are not material planning considerations in determining this application.
- 7.4 It is relevant to note that the site has not been identified as a Strategic Employment Area in the Council's Pre-Submission Spelthorne Local Plan June 2022 (i.e. the emerging Local Plan).
- 7.5 Therefore, the principle of an extension to this existing commercial premises to expand the employment use in Shepperton is acceptable and is complies with Policy EM1 of the CS & P DPD.

Design and Appearance

- 7.6 Policy EN1(a) of the CS & P DPD states that the Council will require a high standard in the design and layout of new development. Proposals for new development should demonstrate that they will: create buildings and places that are attractive with their own distinct identity; they should respect and make a positive contribution to the street scene and the character of the area in which they are situated, paying due regard to the scale, height, proportions, building lines, layout, materials and other characteristics of adjoining buildings and land.
- 7.7 The site is located on the periphery of the town centre and within the Shepperton Employment Area. The area is mixed in character where there is a variety of different building styles and scale. Station Road itself has a mixture of building types including two storey Victorian houses, a bungalow, single storey garages/outbuildings and more modern two storey developments towards the end of the road. Terminal House itself is a 1960's commercial building, with a low profile pitched roof. The proposed extension will replicate the design and style of the host building to which it will be attached and will be slightly taller in height to that part of the existing building to which it is to be attached. It extends 15.517m and has a depth of 6.946m. The distance between the frontage of the extended building matches that of the existing building, creating a similar extended area of hardstanding for cars to park off Station Road, directly outside Terminal House. Materials are shown to match the existing building.
- 7.8 Therefore, it is considered that the proposed design and appearance is acceptable and complies with the requirements of Policy EN1 of the CS & P DPD and the NPPF.

Impact on adjoining properties

- 7.9 Policy EN1(b) of the CS & P DPD states that new development should achieve a satisfactory relationship to adjoining properties avoiding significant harmful impact in terms of loss of privacy, daylight or sunlight, or overbearing effect due to bulk and proximity or outlook.
- 7.10 With regards to impact on light and overbearing, the proposed development would be located adjoining the railway line. The nearest neighbouring properties are those on the opposite side of Station Road to the north and east. The nearest are 4 Old Charlton Road, which has a side boundary to the application site and 13 Station Road which has a frontage facing the application site and has a side garden area. These properties are located approximately 11m away from the proposed extension, which stands at 6.6m in height. As a result of this separation distance, it is not considered that the proposal will give rise to any significant adverse impacts to nearby properties in regard to any loss of light or overbearing or visual amenity.
- 7.11 The proposed extension does have windows along its front and rear elevations at both ground and first floor level. However, in view of the relationship with nearby properties and the 11m separation distance to the properties on the other side of Station Road, including that at 4 Old Charlton Road, no loss of privacy is considered to result from the proposal.
- 7.12 It is not considered that any noise and disturbance arising from the construction will give rise to any significant harm that would justify refusal on these grounds. The proposed extension is for the same use as existing and the site is located close to the railway and in an existing commercial area. Therefore, the proposal is not considered to result in any ongoing concerns regarding noise from the future Use Class E use of the extension.
- 7.13 Therefore, the proposed extension is not considered to result in any adverse impacts upon the amenity of adjoining properties and complies with Policy EN1 of the CS & P DPD.

Parking

- 7.14 Policy CC3 (Parking Provision) of the CS & P DPD states that the Council will require appropriate provision to be made for off-street parking in development proposals in accordance with its maximum parking standards.
- 7.15 The Council's Supplementary Planning Guidance on Parking Standards sets out the maximum number of parking spaces required for types of development and in General Note 1 states that 'Car parking provision below the standards set out in this document may be acceptable in areas well-served by public transport, particularly town centres'.
- 7.16 A total of 22 no. parking spaces are to be provided, a reduction in the 26 spaces currently provided. The Council's Parking Standards stipulate a maximum of 30 parking spaces for a scheme of this size. Although the proposed parking provision is 8 spaces below the maximum standard, this is a maximum and it is therefore considered acceptable. Moreover, the County Highway Authority has not raised any objections to the proposed parking provision.

- 7.17 Accordingly, the proposed level of car parking is considered acceptable and complies with Policy CC3 of the CS & P DPD.

Highway Issues

- 7.18 Policy CC2 of the CS & P DPD states that the Council will seek to secure more sustainable travel patterns by only permitting traffic generating development where it is or can be made compatible with the transport infrastructure in the area taking into account:
- number and nature of additional traffic movements, including servicing needs,
 - capacity of the local transport network,
 - cumulative impact including other proposed development,
 - access and egress to the public highway,
 - highway safety.
- 7.19 The County Highway Authority (CHA) was consulted on the planning application and has not raised any objections on highway safety matters, subject to a condition requiring a Construction Transport Management Plan.
- 7.20 It is therefore considered that the proposal's impact on the highway is acceptable, and that the development complies with Policy CC2.

Flooding

- 7.21 Policy LO1 of the CS & P DPD states that the Council will seek to reduce flood risk and its adverse effects on people and property in Spelthorne.
- 7.22 The application site is located within Flood Zone 2, which has a medium probability of flooding with between 1 in 100 year and 1 in 1000 year chance of flooding. The proposal is considered to be in a 'less vulnerable' use and falls outside of the criteria where the Environment Agency should be consulted. Therefore, reference is made to the Environment Agency Standing Advice and suitable conditions are recommended.
- 7.23 In terms of existing surface water flooding, the Environment Agency's flood maps show that site is not in an area at risk of surface water flooding.
- 7.24 Accordingly, the proposal is considered acceptable on flooding grounds and complies with Policy LO1 and the NPPF.

Trees and Biodiversity

- 7.25 Policy EN8 of the CS & P DPD (Protecting and Improving the Landscape and Biodiversity) states that the Council will seek to protect and improve the landscape and biodiversity of the Borough by ensuring that new development, wherever possible, contributes to an improvement in the landscape and biodiversity and also avoids harm to features of significance in the landscape or of nature conservation interest.
- 7.26 The application is not subject to the National Biodiversity Net Gain (BNG) requirements, as the existing site has virtually no ecological value, being

entirely covered by the hardstanding of the car park and surroundings to the existing building.

- 7.27 The Council's Tree Officer has visited the site and initially objected to the proposal on the grounds that a Sycamore tree subject to a Tree Preservation Order would be impacted by the proposal. As a result of these concerns, the applicant has amended the proposal to reduce the size of the extension to a position that is now considered acceptable, subject to a satisfactory Arboricultural Method Statement being submitted. On this basis, the Tree Officer has removed his objection..
- 7.28 Accordingly, the proposal is considered to comply with Policy EN8 of the CS & P DPD.

Climate Change

- 7.29 The Climate Change Supplementary Planning Document (SPD) was adopted by the Council in April 2024. It provides more detailed guidance to applicants on how to implement adopted Policy SP7 from the Core Strategy 2009. Policy SP7 seeks to reduce climate change effects by:
- a) promoting inclusion for renewable energy, energy conservation and waste management in new and existing developments*
 - b) development reduces the need to travel and encourages alternatives to car use*
 - c) encourage non car-based travel,*
 - d) promoting the efficient use and conservation of water resources,*
 - e) promoting measures to reduce flooding and the risks from flooding,*
 - f) supporting measures to enhance and manage Staines' role as a public transport interchange.*
- 7.30 There are also three implementation policies; Policy CC1: Renewable Energy Conservation and sustainable Construction, Policy CC2: Sustainable Travel and Policy CC3: Parking provision.
- 7.31 Policy CC1 states that the Council will require residential development of one or more dwellings and other development involving new building or extensions exceeding 100 sq. m to include measures to provide at least 10% of the development's energy demand from on-site renewable energy sources unless it can be shown that it would seriously threaten the viability of the development. A condition will be imposed in order to ensure the policy requirement is met.
- 7.32 There are also other key documents supporting action on climate change; the NPPF 2024 chapter 14 "*Meeting the challenge of climate change, flooding and coastal change*", the *National Model Design Code and Spelthorne Borough Council's Climate Change Strategy 2022 – 2030*.
- 7.33 The scheme is considered to perform well against the Council's climate change policies and the SPD. The development is an efficient use of an existing brownfield site in an employment use and is located in a sustainable location. Accordingly, the proposal is considered acceptable on sustainability grounds.

- 7.34 Accordingly, the proposal complies with the requirements of Policy CC1 of the CS & P DPD.

Other Matters

- 7.35 The Council's Pollution Control Officer (Environmental Health) has raised no objection on contaminated land grounds, requesting an informative due to the site being located on former railway land.
- 7.36 It has been established that an electricity sub-station is present within the existing building, however this is a matter for the utility company and is not a material consideration in assessing this application for an extension

Financial Considerations

- 7.37 Under S155 of the Housing and Planning Act 2016, Local Planning Authorities are now required to ensure that potential financial benefits of certain development proposals are made public when a Local Planning Authority is considering whether or not to grant planning permission for planning applications which are being determined by the Council's Planning Committee. A financial benefit must be recorded regardless of whether it is material to the Local Planning Authority's decision on a planning application, but planning officers are required to indicate their opinion as to whether the benefit is material to the application or not.
- 7.38 The proposal would not generate New Homes Bonus nor is it CIL chargeable. The proposal will generate Business Rates payments which is not a material consideration in the determination of this proposal.

Equalities Act

- 7.39 This planning application has been considered in light of the Equality Act 2010 and associated Public Sector Equality Duty, where the Council is required to have due regard to:
- (a) eliminate discrimination, harassment, victimisation and any other conduct that is prohibited by or under this Act;
 - (b) advance equality of opportunity between persons who share a relevant protected characteristic and persons who do not share it;
 - (c) foster good relations between persons who share a relevant protected characteristic and persons who do not share it.

The question in every case is whether the decision maker has in substance had due regard to the relevant statutory need, to see whether the duty has been performed.

- 7.40 The Council's obligation is to have due regard to the need to achieve these goals in making its decisions. Due regard means to have such regard as is appropriate in all the circumstance.

- 7.41 The applicant states that the proposal will achieve the required standards of accessible and inclusive design. The NPPF defines people with disabilities as individuals that have a physical or mental impairment, which has a substantial and long-term adverse effect on their ability to carry out normal day-to-day activities. This can include but is not limited to, people with ambulatory difficulties, blindness, learning difficulties, autism and mental health needs. It is considered that it would be possible for individuals with some disabilities to access the development.

Human Rights Act

- 7.42 This planning application has been considered against the provisions of the Human Rights Act 1998.
- 7.43 Under Article 6 the applicants (and those third parties who have made representations) have the right to a fair hearing and to this end full consideration will be given to their comments.
- 7.44 Article 8 and Protocol 1 of the First Article confer a right to respect private and family life and a right to the protection of property, i.e. peaceful enjoyment of one's possessions which could include a person's home, and other land and business assets.
- 7.45 In taking account of the Council policy as set out in the Spelthorne Local Plan and the NPPF and all material planning considerations, Officers have concluded on balance that the rights conferred upon the applicant/ objectors/ residents/ other interested party by Article 8 and Article 1 of the First Protocol may be interfered with, since such interference is in accordance with the law and is justified in the public interest. Any restriction of these rights posed by the approval of the application is legitimate since it is proportionate to the wider benefits of such a decision, is based upon the merits of the proposal, and falls within the margin of discretion afforded to the Council under the Town & Country Planning Acts.

Conclusion

- 7.46 The proposed development is on existing employment land and will provide 187sqm of new commercial floorspace in a sustainable town centre location, close to public transport links and local facilities. The proposal is considered to pay due regard to the character and appearance of the area and not result in any adverse impacts upon the amenity of adjoining properties. The proposal would provide sufficient parking and have an acceptable impact upon highway safety. Accordingly, the application is recommended for approval.

8. Recommendation

- 8.1 The options available to the Planning Committee for decision making are:

- To approve the application as set out in this report. This option is recommended. The report analyses in some detail the reasons why the application is considered to be acceptable in planning terms.

- To approve the application subject to additional /amended conditions and informatives. This option is not recommended, the conditions and informatives are set out below. The Planning Committee should be minded of paragraph 57 of the NPPF which states that :- *planning conditions should be kept to a minimum and only imposed where they are necessary, relevant to planning and to the development to be permitted, enforceable, precise and reasonable in all other respects ([National Planning Policy Framework](#))*.
- To refuse the application. This option is not recommended. The report assesses why officers consider the application to be acceptable and there are [no material planning reasons](#) to refuse the proposal.

8.2 The application is recommended for approval, subject to conditions and informatives below.

8.3 **APPROVE** subject to the following conditions:-

1. The development hereby permitted shall be begun before the expiration of three years from the date of this permission.

Reason: - This condition is required by Section 91 of the Town and Country Planning Act, 1990 as amended by Section 51 of the Planning and Compulsory Purchase Act 2004.

2. The development hereby permitted shall be carried out in accordance with the following approved plans and drawings:

E00; E01; E02; E03; E04; P00; P01 and P02 received 12 June 2025

Reason: - For the avoidance of doubt and in the interest of proper planning

3. No development above damp-proof course level shall take place until details of the materials to be used for the external surfaces of the buildings and other external surfaces of the development are submitted to and approved by the Local Planning Authority. The development shall then be constructed in accordance with the approved materials and detailing.

Reason:- To ensure that the proposed development does not prejudice the appearance of the development and the visual amenities and character of the locality, in accordance with policies SP6 and EN1 of the Spelthorne Borough Core Strategy and Policies Development Plan Document 2009.

4. Following construction of any groundwork and foundations, no construction of development above damp-proof course level shall take place until a report has been submitted to and agreed by the Local Planning Authority which includes details and drawings demonstrating how 10% of the energy requirements generated by the development as a whole will be achieved utilising renewable energy methods and

showing in detail the estimated sizing of each of the contributing technologies to the overall percentage. The detailed report shall identify how renewable energy, passive energy and efficiency measures will be generated and utilised for each of the proposed buildings to meet collectively the requirement for the scheme. The agreed measures shall be implemented with the construction of each building and thereafter retained.

Reason:- To ensure that the development is built in accordance with the submitted renewable energy details and is sustainable and complies with Policy SP7 and CC1 of the Spelthorne Development Plan Core Strategy and Policies DPD.

5. No development shall commence until a Construction Transport Management Plan, to include details of: (a) parking for vehicles of site personnel, operatives and visitors (b) loading and unloading of plant and materials (c) storage of plant and materials (d) programme of works (including measures for traffic management) (e) provision of boundary hoarding behind any visibility zones (f) HGV deliveries and hours of operation (g) measures to prevent the deposit of materials on the highway (h) on-site turning for construction vehicles has been submitted to and approved in writing by the Local Planning Authority. Only the approved details shall be implemented during the construction of the development

Reason: - This condition is required in order that the development should not prejudice highway safety, nor cause inconvenience to other highway users, and in order to protect local air quality and the amenity of neighbouring occupants.

6. The development hereby approved shall not be first occupied unless and until facilities for the secure, lit and covered parking of bicycles and the provision of a charging point with timer for e-bikes by said facilities have been provided within the development site in accordance with a scheme to be submitted to and approved in writing by the Local Planning Authority and thereafter the said approved facilities shall be provided, retained and maintained to the satisfaction of the Local Planning Authority.

Reason: In order that the development makes suitable provision for sustainable travel, in accordance with the sustainable objectives of Chapter 9 "Promoting sustainable transport" of the National Planning Policy Framework 2024, and Policies CC2 and CC3 of Spelthorne Borough Council's Core Strategy and Policies Development Plan Document February 2009.

7. No demolition, site clearance or building operations shall commence until an Arboricultural Method Statement has been submitted to and approved in writing by the Local Planning Authority providing protection measures for the trees on the adjoining site. The development shall be implemented in accordance with the recommendations of the agreed Arboricultural Method Statement. The destruction by burning of

materials shall not take place within 6 m (19 ft. 8 ins) of the canopy of any tree or tree group to be retained on the site or on land adjoining.

Reason:- To prevent damage to the trees in the interest of the visual amenities of the area, in accordance with policies SP6 and EN1 of the Spelthorne Borough Core Strategy and Policies Development Plan Document

8. There shall be no raising of existing ground levels on the site within the area liable to flood, other than in accordance with the approved details.

Reason:- To prevent the increased risk of flooding due to impedance of flood flows and reduction in flood storage capacity in accordance with policies SP1, SP7 and LO1 of the Spelthorne Borough Core Strategy and Policies Development Plan Document 2009.

9. All spoil and building materials stored on site before and during construction shall be removed from the area of land liable to flood upon completion.

Reason:- To prevent the increased risk of flooding due to impedance of flood flows and reduction in flood storage capacity in accordance with policies SP1, SP7 and LO1 of the Spelthorne Borough Core Strategy and Policies Development Plan Document 2009.

Informatives

- 1) The developer is reminded that it is an offence to allow materials to be carried from the site and deposited on or damage the highway from uncleaned wheels or badly loaded vehicles. The Highway Authority will seek, wherever possible, to recover any expenses incurred in clearing, cleaning or repairing highway surfaces and prosecutes persistent offenders. (Highways Act 1980 Sections 131, 148, 149).
- 2) Section 59 of the Highways Act permits the Highway Authority to charge developers for damage caused by excessive weight and movements of vehicles to and from a site. The Highway Authority will pass on the cost of any excess repairs compared to normal maintenance costs to the applicant/organisation responsible for the damage.
- 3) The applicant is advised that the site to which this planning permission relates is located on or near land that may contain harmful substances. Under Part C of the Building Regulations you will be required to consider this when designing the foundations of the development.

The applicant is advised to contact Spelthorne's Pollution Control team on 01784 446251 for further advice and information before any work commences.
